Skin Scan	✓	✓	✓
Appropriate supplementation each month	✓	✓	✓
Skincare products to use at home	✓	✓	
Access to your skin coach throughout the programme	✓	✓	×
Access to the Skin Programme YouTube information platform	✓	✓	×
Unlimited in-clinic treatments	✓	×	×

- Payment plans are available for our Radiate and Renew Programmes.

BLEMISH REMOVAL

Utilising the modalities listed below we have the ability to remove unwanted blemishes & lesions from the skin. These may be skin tags, cherry angioma, spider naevae, milia, pigmented areas, sebaceous hyperplasia, seborrheic keratosis, verucae and warts. Treatment can be undertaken in as little as 15 minutes and is undertaken by our level 4 qualified skin specialists.

CRYOTHERAPY

The Cryopen emits a fine jet of Nitrous Oxide under high pressure, which allows us to work with millimetre precision. This destroys the tissue by freezing the inter-cellular fluid, forming ice shards and crystals which rupture the membrane, thereby destroying the cell. This means there will be no collateral damage to healthy tissue. It is incredibly accurate and practical. Dependant on size/depth, some lesions may require a 2nd treatment. Follow-up treatments are most likely with warts and verrucae.

A consultation will be required to assess your concerns and suitability. All pigmented moles and unknown lesions will require assessment via your GP and written clearance given before removal can take place.

ADVANCED ELETROLYSIS

Advanced electrolysis has been widely used for over 100 years to treat a wide variety of skin imperfections. Advanced electrolysis works by using an electric current and a very fine needle to cauterise a skin imperfection. Using a sterilised and disposable probe and variable current. This produces a heating effect which, when applied to the blemish, causes the structure and its content to coagulate or dry up. Your skin then begins the healing process. This allows the dead skin cells which were involved in the electrolysis process to push up to the surface of the skin and flake off much the same way as a tiny cut heals. The treated area may also crust over or form a scab, once this heals the skin will re-pigment and leave a blemish free skin behind.

	CONSULTATION & TREATMENT OF 1 LESION	EACH ADDITIONAL LESION	FOLLOW UP TREATMENT (1 LESION)	EACH ADDITIONAL LESION
Skin Tag, spider Naevi, Cherry Angioma, Millia, Seborrheic keratosis (age spots), etc.	£85	£15	£55	£15
